

Since 1962 we are producers of alfalfa forages: dehydrated, ventilated and sun dried.

TMc02-4 *Evolution Wafer Mantenimento*

Evolution wafer mantenimento TMc02-4 is a complete and balanced feed, suitable for **horses in the maintenance stage, and for riding-stables or lightly worked horses**.

It is prepared from a precisely formulated, dust-extracted mixture of forages, cereals and sugar cane molasses. The ingredients are then rolled into flakes to improve digestibility, and pressed to form a wafer that is convenient and easy-to-feed.

The high fibre content of the wafer helps promote peristalsis of the equine digestive system and optimal assimilation of nutrients.

The certified traceability and controlled supply chain assure consumers that all the ingredients are of the highest quality, with excellent nutritive value. The result is a healthy, natural and well-balanced feed, that fully respects your horse's biological needs.

Nutritive values

Crude protein	11 %
Crude oils and fats	1,25 %
Crude cellulose	24 %
Crude ash	1 %
Total sodium (Na)	0,25 %

TMc02-4 Evolution Wafer Mantenimento

SIZE

Pallet 90x90x190cm, containing 33 sacks
 Sacks 30 kg
 Wafers 4x4x4 cm or 2x2x2 cm

STORAGE

The product should be stored in a cool dry place

RAW MATERIALS USED

Forage
 Whole corn
 Whole barley
 Whole oats
 Roasted whole soybean
 Beet pulp
 Wheat groats
 Sugar cane molasses

INSTRUCTIONS FOR USE

Rations based on Evolution wafer mantenimento TMc02-4 should be adequately supplemented with vitamins and minerals.
